## Sale Day Bid Online:

## Cattlemen,

Welcome to the 14th Annual SWSG Simmental Influence production sale. This fall and winter, we have had some of the highest feeder and fat cattle prices in history, making it important in your future decisions to purchase better breeding cattle. The SWSG breeders sell some of the best Simmental influence cattle in the state every year in Dunlap. If you're looking for Bulls - Breds - Opens they are here!

8	1	57	94	13	5	33	21	19	-.06	.22	0	.42	124	79

Zazu is an ET son of Upgrade and our Portia donor. He is homozygous black and polled. He combines calving ease, explosive growth, and fantastic maternal values along with carcass numbers that are top notch all together in an eye catching package. A flushmate, Fitz Pol Optima, was a sale feature in the first SWSG Fall Show Cattle Auction (2011). Zazu is also a maternal brother to Fitz Pol Boxcar. Boxcar is the reigning Purebred Performance King of the American Simmental Association's Carcass Merit Program. Come look up Zazu before the sale. You'll be glad you did. **Adj. YW is 1513.**

101Y is a stout made Macho son out of a Janssen Farms donor cow that is as powerful and massive as you would want one. He was purchased as an embryo because we like the power and fertility that his pedigree is known for. In addition to impressive performance, he will sire the kind of females that make excellent replacements. Attractive star headed and nice fronted to go along with it.

This black brockel faced, smooth polled, huge topped, deep sided Boxcar son really puts together the total package! His actual birthweight, from his first calf heifer mother, was 78 pounds, the lowest birthweight of all our bull calves. His weaning weight of 985 pounds, was our 2nd highest. Brock combines calving ease, explosive growth, solid maternal values, & top notch carcass numbers into one of the coolest looking bulls we have ever produced. His sire, Fitz Pol Boxcar, has sired many calves in the American Simmental Association's Carcass Merit Program that have impressed those who have seen them with the quality & consistency. Come & look up Brock before the sale. You will be glad you did. Adj. YW is 1601

An extremely stylish 3/4 blood Static son with a low birthweight. We debated making this one into a steer for my nephew to show with his eye appeal and muscle. He truly could have been competitive that way but we thought that he had too much value as a breeding bull. If you need a low birthweight bull to clean up your heifers and want to have calves with some style when you are done, you should look closely at this one.

This is a real opportunity here! This female comes straight from the heart of our donor program. We own this female with Kevin Hauswirth at R&K. We really believe this female could be the top donor at any program just as she has been at ours. We have embryos in the tank and thought we would share her with somebody new in the prime of her life. The pedigree on this cow speaks for itself. She is a maternal sister to the great Cashmere and a maternal sister to the \$36,000 Elegance female that won the 2009 National Western Junior show in Denver. This cow will still be making a huge impact on our herds and we feel very confident she is going to make a huge impact on yours as well. This kind is hard to find, a real program changer here.

Sells Open - Pregnancy sells as Lot 42

Sale feature here! Owned with Kevin Hauswirth of R&K. I know this is a common saying but this cow is only on this sale because we think people will love her and we wanted to bring our best to the sale. She has been in transplant for us being used as a club calf donor but we believe she could be just as valuable as a Simmental donor as well. Her calves have been high sellers in our club calf sales including a steer that will be showing this summer in Wisconsin and a heifer that may enter our donor pen when she is done showing. Don't miss an opportunity to buy a proven money maker that will impress everyone who stops by the farm and put calves on the front age of your next ad.

Here is an exclusive opportunity to purchase embryos from a new exciting mating. These embryos are sired by the hottest bull of any breed at the 2011 National Western Stock Show in Denver. Ruby NFF Excalibur 002X, a purebred son of LBS The Foreman 702T, commercial \$65,000 for 1/2 interest at "The One" Simmental Sale. We used him for a flush from Lazy H Bar Forever Lady 7190. The Forever Lady cow family is one of the best and most popular cow families at Express Angus Ranch. 7190 is a granddaughter of the famous donor dam VAR Forever Lady 4304. 4304 was a 2 time National Western Reserve Champion Female and has produced more than \$750,000 worth of progeny by year 2007. This powerful cow line is a proven source of added muscle genetics. Therefore her granddaughter 7190 has lots of volume and thickness and still maintains an attractive look through her front end. When you combine Forever Lady 7190 with the long and clean necked Excalibur, who also has the ability to combine so much mass, muscle and soundness, this only adds to the appeal of this exciting mating. 7190's sire BC 7022 Raven 7965 really completes this genetic package. These calves will very possibly have a white face and exceed your greatest expectations.

**Selling 3 embryos. Seller guarantees one pregnancy if implantation is performed by a certified embryologist.**

This is a great opportunity to get in on one of the new great club calf donors in the business. This TH and PHA free Meyer 734 daughter is an absolute powerhouse. This last fall was the first calf crop for sale on this ground sow and she really produced. Her first calf raised by Brent Svuba & Brian Ruppert sold for \$14,500 on Matt Reints fall sale. She was later placed by Matt Lautner and is now being shown by the Snedden family. She has already gone on to win Grand Champion Market Heifer at the Kansas Beef Expo and should be a force this summer. We also sold a heifer by Unforgiven for \$6,000 to Oklahoma. When that one gets done she is going to be a big time donor as well. This cow is just getting started. Her calves will without a doubt be headliners again this fall. If you want to make an immediate impact on the club calf industry and want to produce high sellers and show champions you can't overlook this opportunity.

\$14,500 daughter by Monopoly

\$6,000 daughter by Unforgiven

**Selling choice of 3 embryos by either Monopoly or Unforgiven. Seller guarantees one pregnancy if work is done by a certified embryologist.**

**Triple C American Girl N07J Embryos**

Consignor: Golden Acres Simmental

Triple C American Girl N07J has become our top purebred donor having proven herself over and over again. N07J was a top producer for Triple C Farms producing the Champion Power Bull in Denver, Triple C Main Event, now an AI sire for Cattle Visions. She also produced 2 top sellers in Triple C's Bullenium Sales. Her heifer sired by Jades Dreamworks was class winner in a very strong class at the 2010 Iowa State Fair and went on to win Grand Champion Simmental Female at the 2011 Midwest Fall Classic. N07J is a full sister to the 2005 Res. Champion Bull at Denver and now popular AI sire, Triple C Positive Power as well as the 2008 Res. Champion Bull at Denver, Triple C Power Dozer. N07J is also the daughter of Triple C Go Girl who has had over \$500,000 in progeny sales herself. **Selling 3 lots of 3 Embryos.**

**Guarenteeing 1 pregnancy per lot if work is done by a certified embryologist.**

3C Macho M450 BZ  
WK Ms Primrose Lady 9016

GA Miss Macho 954W is a 2 time Grand Champion Low % Simmental Female at the Midwest Fall Classic. This 954 donor is special. She is out of an outstanding donor from Whitestone-Krebs that made some of the greatest Foundation females we ever owned in her short life here. 954W is a maternal sister to last year's high selling female to Andy Lown and she is also a full sister to a high seller two years ago to Jerry Ferguson. This 954 female was a many time champion show heifer in her own right and we think she is the future of our herd. Judges remarked about this cow's soundness and phenomenal structure. She also has plenty of muscle and beautiful head and neck. This should be a perfect cross for some big time high sellers and show winners. We have serval coming this spring that will be promoted this fall. These calves should be big time. There may not be any more eggs for sale after we get them on the ground.

GA Miss Macho 954W - Donor Dam of Lot 47

**Selling choice of 3 or 5 embryos. Seller guarantees 1 pregnancy out of 3 or 2 pregnancies out of 5 if work is done by a certified embryologist.**

It is hard to write this footnote without taking up a whole page. This female is a full sister to the high selling female at the 2011 IA Beef Expo at \$6,000 for Dennis Larson. She really is what our whole cowherd is all about. I bet we went 10 yrs. bringing at least 1 brother to this female to the Beef Expo & they were our high sellers every year. The donor mom to this heifer was the cornerstone of our herd for years and goes back to the Christa cow we owned years ago with Janssen Farms. That is where the Reba cow family started for them. If we didn't have so many sisters already in the herd, this female would not be for sale. There isn't much else to say except this cow will flat out produce. This cow has it all. **No clean up bull.**

Past. Exposed 6-20 to 7-10 to Urban Street (Ali son)

We just can't say enough about the eye appeal of these Macho daughters and this star faced one is no exception. Her dam is the Emblazon 433 donor that has raised so many nice females by macho and Meyer. 028X is super clean made and feminine about her front end. She's structurally sound and big ribbed. She'll make an excellent clubby mama or breed her up in your purbred program. Full Sister to Lot 70.

Only because of our commitment to the quality of this sale, do we offer a female of this magnitude. Jackie is star faced, about as deep, long, & feminine as you could make one, & she could get fat on wind and water! As an added bonus she produces a ton of milk! Her Domination calf will be very special, as the Domination cattle are topping sales all over the country. Ultrasounded safe to Domination. Definite donor cow material!

 Female Donkey

This year we are offering a breaking donkey. Think of how your life will be much easier knowing that you won't have to break anymore cattle yourself. After using this donkey you'll say "Worth every penny!" This donkey is female.

## Quick Reference to ASA EPDs and \$ Indexes

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**Back Fat (BF):** Inches of backfat.

**Birth Weight (BW):** Pounds of birth weight.

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Carcass Weight (CW):** Pounds of carcass weight.

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.

**Milk (MLK):** Pounds of weaning weight due to milk.

**Marbling (MRB):** Marbling score.

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.

**Ribeye Area (REA):** Square inches of ribeye.

**Warner-Bratzler Shear Force (WBSF):**

Pounds of force required to shear a steak.

**Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

**Weaning Weight (WW):** Pounds of weaning weight.

**Yearling Weight (YW):** Pounds of yearling weight.

**Yield Grade (YG):** Yield grade score.

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ( $\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$ ). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

# EDJECast.com

live web casting

We are pleased to provide live web casting of this auction through EDJECast.com, allowing you to view and bid online, as if you were at the auction.

We recommend that you have high speed internet access to bid online. Dial-up or poor connections will slow the posting of your bid. If you have questions, contact Jennifer Smith at 866-839-3353.

To register and bid:

- Visit the EDJE Cast website at [www.edjecast.com](http://www.edjecast.com)
- Click the "NEED TO REGISTER?" button.
- Create a username and password then fill in the requested information. Click the "REGISTER" button.
- You will receive an email validation of your username and be directed back to the EDJE Cast home page. Log in using your newly created username and password.
- Once you have logged in, select the specific event or auction and click "REGISTER TO BID."
- Fill in all requested information, including the banking info, read and agree to the Terms and Conditions, then click the "Submit" button. You will be assigned and emailed a bidder number.
- The auction video will start about 15 minutes prior to the auction.
- Click the "View EDJE Cast Auction" to view the auction.
- After the sale, please contact the sale manager to arrange payment for your online purchases. Delivery is the responsibility of the buyer and should be arranged with sale management. Liability becomes the sole responsibility of the buyer upon the sale of the animal.

EDJE  
EQUINE DIVERSITY

## Notes

**BIDDING & APPLICABLE LAW:** All cattle listed in this offering comply with prevailing sale terms and conditions as set forth by the laws of the state wherein the sale is conducted. There are no warranties, expressed or implied, by either the auctioneer or consignor, except as set forth herein, as to the merchantability of fitness for any particular purpose of any animal offered in this sale. The right to bid or the right to reject the final bid, if done before the hammer falls, is reserved for all sellers unless otherwise announced from the sale block or as prohibited by law in the state wherein the sale is being conducted.

**ANNOUNCEMENTS:** Any change of information other than in the catalog will be announced from the auction block and such announcements shall take precedence over printed material. All statements made from the auction block or those made by the seller (in private treaty), must be documented by seller if requested by the buyer at time of sale.

**TERMS:** Terms of sale are cash unless satisfactory credit arrangements have been made with the seller previous to the sale of any animal so affected.  
**PURCHASER'S RISK:** Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold; except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of twenty-four (24) hours after the sale, whichever occurs first.

**HEALTH REQUIREMENTS:**

1. All cattle entered for sale must meet the health regulations of the state in which they are sold. All other agreements regarding the health of the animal will be between the buyer and seller and should be documented in writing.
2. If sale cattle are returned to the seller for an adjustment, they must meet the health requirements of the state they are returned to.

**CERTIFICATE OF REGISTRY:** Each animal, which is catalogued, offered and sold as a registered animal, shall have a certificate of registry available at time of sale. When an animal is sold as "eligible for registry" or "registry applied for", the seller shall be responsible for obtaining the certificate of registry and for the proper transfer of the certificate to the purchaser including full payment of transfer fees.

**IDENTIFICATION:** Each animal, at time of sale, must have a readable tattoo or brand corresponding to that shown on the certificate of registration.

**AUTHENTICITY OF PEDIGREE:** When an animal, through parental validation, is determined to have an ancestry other than that reported on the registration certificate, the buyer shall be entitled to a refund of the purchase price from the seller upon return of the animal to the farm of the seller at the seller's expense. The animal in question, at the buyer's option, may be exchanged for another animal of equal value, or if agreeable with the buyer, the seller may have the certificate returned to the buyer. Any adjustment provided herein, if selected, shall absolve the seller from further liability for authenticity of pedigree to the buyer.

**BREEDING GUARANTEES AND DEFINITIONS:**

1. Females are guaranteed to be breeders, with the exception of:
  - a. Female calves sold at side of dam
  - b. Injury or disease occurring to the animal after time of sale
  - c. Gross negligence or willful misconduct on the part of the purchaser
  - d. Females used in ovum transplant after time of sale
  - e. Cows sold with calf at side or a female that calves after sale to breeding prior to the date of sale
2. Bulls are guaranteed to be breeders (defined as the ability to settle healthy cows by the time the bull is 18 months of age) with the exception of:
  - a. Bull calves sold at side of dam
  - b. Injury or disease occurring to the animal after time of sale
  - c. Gross negligence or willful misconduct on the part of the purchaser
  - d. Bulls shown competitively after sale
3. Any guarantees with respect to the ability to freeze semen shall be made by separate agreement between buyer and seller.
4. Safe in calf females are females that have been diagnosed pregnant by a competent veterinarian, and are pregnant at time of sale.
5. A bred female is a female known to have been served by a bull either by natural breeding or artificial insemination, but it does not necessarily mean the female is safe in calf to that service.
6. A pasture-bred female is a female that has been pastured with a designated bull and has been exposed for the time stated, but it does not necessarily mean that this female is safe in calf to that bull.
7. An open female is a non-pregnant animal.
8. Calves sold off their dams (split pairs) shall carry the full breeding guarantee.

**PRIVILEGE OF PURCHASER TO EXAMINE:** The purchaser of a female animal may have her examined within twenty-four (24) hours after the fall of the hammer and prior to removal from sale premises. The pregnancy status or breeding status of a female so examined, when found not to be as represented at the time of sale, is cause for the female to be returned to the seller as unsold.

**EMBRYO TRANSFER:**

1. Sellers should provide upon request a complete history of embryo transfer activity for any female offered for sale.
2. Withholding information on the existence of frozen embryos at the time of sale would be considered an unethical practice.

**BORNED-SCURRED-POLLED DEFINITIONS:**

1. HORNED - An animal with a horn growth affixed to the skull that has or has not been removed.
2. POLLED/SCURRED - An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.
3. POLLED - An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.)
4. SMOOTH POLLED - A smooth-polled individual has no scurs and does not develop scurs later in life.

**GUARANTEES:**

1. If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value whichever is acceptable to the buyer. The buyer has thirty (30) days from date of sale to notify the seller that an adjustment is in order.
2. If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or at the buyer's option shall be exchanged for a smooth-polled animal of equal value.
3. If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment as a scurred animal is considered polled.
4. If an animal is sold as polled and has scurs, it shall be so announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

**OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:** The following adjustments do not preclude the right of the buyer and seller to mutually agree upon other terms and conditions for settlement of any dispute.

1. All claims for adjustment or refund must be made in writing either six (6) months from the date of sale or no later than when the animal reaches 24 months of age whichever occurs later, with the exception of claims involving misrepresentation of service sire or as otherwise provided herein.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller, at the buyer's expense, if in good physical condition, and the return is in compliance with the health requirements of the seller's state. The seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove the animal is a breeder. If at the end of six (6) months the seller is unable to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. Either option shall be deemed full satisfaction and settlement.
3. If a female is sold as "safe in calf" to a given sire or sires on a specified date or dates and proves not to be as represented, the buyer is entitled to a refund of the purchase price from the seller upon return of the animal and resulting progeny thereof to the farm of the seller at the seller's expense.
4. If a female is sold a "open" and proves to be with calf at time of sale and examined pregnant within sixty (60) days after sale, the buyer may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. It shall be the obligation of the seller to bear any expenses incurred for transportation of the animal in question to the farm of the seller.

**GENETIC TESTING AND TraitTrac STATUS:** Sellers must identify the TraitTrac status and the results of any qualitative genetic testing performed on any animals or genetic material offered for sale. The ASA considers it an unethical practice to misrepresent or fail to disclose the TraitTrac status or qualitative genetic test results of any animal or genetic material.

**DISCLOSURE OF MATERIAL INFORMATION:** Sellers must disclose all material information concerning any animal or genetic material offered for sale. For the purposes of these Sale Terms and Conditions, "Material Information" is defined as any information which would be likely to affect the value of the animal or genetic material if the information were known to the public.

Material Information includes, but is not limited to, information related to genetic tests, blood tests, ultrasound pregnancy results, disease tests, pregnancy and fertility test results, information related to the sex and age of in utero calves or embryos, and information related to the fertilization status of in utero calves, including whether the calf was conceived via artificial insemination or natural service. The ASA considers it an unethical practice to misrepresent or fail to disclose any Material Information concerning an animal or genetic material offered for sale.

**LIMITATIONS OF OBLIGATIONS:** These sale terms and conditions constitute a binding legal obligation between the buyer and seller of any animal or genetic material sold under these terms and conditions. However, the ASA, its directors, officers, employees and agents do not assume any obligation, legal or otherwise, to enforce the sale terms and conditions agreed to between buyer and seller.
