## Cattlemen

*The SWSG will hold their 13th annual sale featuring Simmental, Percentage Simmental, & Club Calf influenced cattle, always a highlight for cattlemen looking for money-making cattle whether it's selecting a Simmental bull that will increase weaning weights or promotional bulls like KCC Saginaw that sold last year that has created a lot of excitement in the Club Calf Business.*

*One of the largest selection of Bred Heifers and Cows to sell in this area, A-I bred to Simmental and Club Calf Sires.*

*Always a Genetic Opportunity to select embryos that will be money makers.*

*Sale consultants and Ringmen are available to handle order buying or bids on sale day if you don't make it to the sale.*

*We look forward to presenting you with another great sale offering!! Don't miss out on the SWSG Sale.*

*Larry Martin  
LMCS*

**Watch & Bid Live at [www.lmaauctions.com](http://www.lmaauctions.com)**

**Video Parade of Cattle (live only - no archive) - Saturday 2:30PM**

*Please register 3 days before the sale to bid*

GA Dream Catcher 924 W as a yearling - Lot 1

## GA Dream Catcher 924W

Consignor: Golden Acres Simmental

Polled Purebred Bull ASA# 2499463

Tattoo: 924W BD: 2-13-09 Adj. BW: 76 Adj. WW: 755

7	1	33	60	4	6	23	21	.1	-.04	.51	.01	.20	131	73

I can't say enough good things about this Dream Catcher son. We wouldn't let him go if we didn't have so many Dream On cows in the herd. 924W was named Gr. Champ. Simmental Bull at the Midwest Fall Classic as a calf & we used him on a small group of cows this summer so we couldn't show him as a yearling. He's really thick from head to tail and has great rib shape & capacity to go with it. He's big boned & structurally sound. His mother has been added to our donor pen after producing 4 super calves in 4 years. We are so proud of this bull that we flushed her back to Dream Catcher for her 1st flush. This is definitely a senior herd sire prospect. We are sure you'll love his calves.

CNS Dream On L186 - Sire of Lot 2

## NS Dream On W9

3	4	41	70	5	4	25	22	10	-.01	.13	.03	.39	105	63

This blaze faced son of JS Masterpiece was born too late to sell as a yearling so we kept him & a friend used him as a clean-up bull. He's long spined, easy fleshing and full of red meat. He's the kind to add pounds & performance to your calf crop. On the dam side of his pedigree he goes back to the Triple C donor "Hugs & Kisses". With this great maternal pedigree, he should sire some great heifers to keep in the herd. He's structurally sound & has a great disposition.

## Schorg's W985

Consignor: Schorg Simmentals

This blaze faced calf from the "Joy" cow family deserves some extra attention if you're looking for a new herd sire with proven genetics. His sire "In Dew Time" is the most popular calving ease bull in the Simmental breed and the "Joy" cow family needs no introduction as the leading cow family. This bull is big butted, big topped with an excellent spring of rib. His calves will certainly perform and the heifers will make great mama cows. Don't miss this one!

Klondike is a solid black Legend son that is smooth shouldered, extra deep sided, long spined bull that combines calving ease, explosive growth, and rock solid carcass traits. He had an actual birth weight of 85 pounds along with a weaning weight of 920 pounds. He was our highest performance bull from our 2010 calf crop.

BKCC Miss Hearteat 4H

Here is a little different bull for us to raise let alone bring to a sale. We bought his Meyer mother from Ben Kelley a couple of years ago and had one straw of Ali in the tank so we thought that was the obvious mating. This guy performed far too well to work as a steer so we thought we would try to market him as a bull. He is stout, sound, and big bodied. Most importantly, he is a low birthweight baldy Ali x Meyer.

VSF Ali 032X - Lot 32

AI Bred 6-3-10 to In Dew Time

This female's cow family is as old as any on the farm and as you look her over you will see why. They are easy keeping, heavy muscled, fertile and heavy milkers. We have several sisters in our herd as well as one of them being a donor for us. No guess work on this one! Safe to In Dew Time. No clean up bull.

AI Bred 6-4-10 to SVF/NJC Motown M216

We have sold a lot of top selling bulls out of this mating but have retained almost all the females. Analyze this one closely - she's all cow. At 12 years old, her donor dam looks like a 4 yr. old - sound, super easy fleshing with an excellent udder. Don't miss this last opportunity to get in on these fantastic genetics. Safe to Motown. No clean up bull.

### AI Bred 6-5-10 and 6-27-10 to In Dew Time

Here's a red female with a lot of potential in your purebred or crossbred program. She's got all the right parts to make an excellent mama cow. She's a non-diluter so if you want black calves, just breed her to homozygous black bulls and you'll get them. The vet pregged her to the 2nd date, but keep an eye on her earlier. **No clean up bull.**

**AI Bred 6-3-10 to WAGR Dream Catcher**

It is with mixed emotions that we have decided to part with this top producing donor. We have a tank full of embryos by Meyer 734 & 3C Macho so we decided to share this prolific female. We have 3 Macho daughters in the keeper pen at home that are all neat fronted, big bodied, structurally sound and have the look of great mama cows. We also have a Macho son in this sale selling as Lot 41. We didn't flush her to Meyer 734 in time to get any calves in 2010, but we are excited for their arrival in 2011. I can't describe 433 adequately with words so you evaluate her on sale day. I think you'll agree she can work in any donor program. She averages 20 freezable embryos per flush. Embryos by both Meyer 734 & 3C Macho sell as Lots 104 A-D. She's safe to Dream Catcher. **No clean up bull.**

SWSG - Special Lots & Reference Sires

## Definitions of EPDs & Indexes

### Quick Reference to ASA EPDs and \$ Indexes

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**Back Fat (BF):** Inches of backfat.

**Birth Weight (BW):** Pounds of birth weight.

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Carcass Weight (CW):** Pounds of carcass weight.

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.

**Milk (MLK):** Pounds of weaning weight due to milk.

**Marbling (MRB):** Marbling score.

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.

**Ribeye Area (REA):** Square inches of ribeye.

**Warner-Bratzler Shear Force (WBSF):**

Pounds of force required to shear a steak.

**Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

**Weaning Weight (WW):** Pounds of weaning weight.

**Yearling Weight (YW):** Pounds of yearling weight.

**Yield Grade (YG):** Yield grade score.

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

# Suggested Sale Terms & Conditions

## American Simmental Association (Revised 1/2011)

SWMSG - Terms & Conditions

**BIDDING & APPLICABLE LAW:** All cattle listed in this offering comply with prevailing sale terms and conditions as set forth by the laws of the state wherein the sale is conducted. There are no warranties, expressed or implied, by either the auctioneer or consignor, except as set forth herein, as to the merchantability of fitness for any particular purpose of any animal offered in this sale. The right to bid or the right to reject the final bid, if done before the hammer falls, is reserved for all sellers unless otherwise announced from the sale block or as prohibited by law in the state wherein the sale is being conducted.

**ANNOUNCEMENTS:** Any change of information other than in the catalog will be announced from the auction block and such announcements shall take precedence over printed material. All statements made from the auction block or those made by the seller (in private treaty), must be documented by seller if requested by the buyer at time of sale.

**TERMS:** Terms of sale are cash unless satisfactory credit arrangements have been made with the seller previous to the sale of any animal so affected.

**PURCHASER'S RISK:** Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold; except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of twenty-four (24) hours after the sale, whichever occurs first.

#### HEALTH REQUIREMENTS:

1. All cattle entered for sale must meet the health regulations of the state in which they are sold. All other agreements regarding the health of the animal will be between the buyer and seller and should be documented in writing.
2. If sale cattle are returned to the seller for an adjustment, they must meet the health requirements of the state they are returned to.

**CERTIFICATE OF REGISTRY:** Each animal, which is catalogued, offered and sold as a registered animal, shall have a certificate of registry available at time of sale. When an animal is sold as "eligible for registry" or "registry applied for", the seller shall be responsible for obtaining the certificate of registry and for the proper transfer of the certificate to the purchaser including full payment of transfer fees.

**IDENTIFICATION:** Each animal, at time of sale, must have a readable tattoo or brand corresponding to that shown on the certificate of registration.

**AUTHENTICITY OF PEDIGREE:** When an animal, through parental validation, is determined to have an ancestry other than that reported on the registration certificate, the buyer shall be entitled to a refund of the purchase price from the seller upon return of the animal to the farm of the seller at the seller's expense. The animal in question, at the buyer's option, may be exchanged for another animal of equal value, or if agreeable with the buyer, the seller may have the certificate returned to the buyer. Any adjustment provided herein, if selected, shall absolve the seller from further liability for authenticity of pedigree to the buyer.

#### BREEDING GUARANTEES AND DEFINITIONS:

1. Females are guaranteed to be breeders, with the exception of:
  - a. Female calves sold at side of dam
  - b. Injury or disease occurring to the animal after time of sale
  - c. Gross negligence or willful misconduct on the part of the purchaser
  - d. Females used in ovum transplant after time of sale
  - e. Cows sold with calf at side or a female that calves after sale to breeding prior to the date of sale
2. Bulls are guaranteed to be breeders (defined as the ability to settle healthy cows by the time the bull is 18 months of age) with the exception of:
  - a. Bull calves sold at side of dam
  - b. Injury or disease occurring to the animal after time of sale
  - c. Gross negligence or willful misconduct on the part of the purchaser
  - d. Bulls shown competitively after sale
3. Any guarantees with respect to the ability to freeze semen shall be made by separate agreement between buyer and seller.
4. Safe in calf females are females that have been diagnosed pregnant by a competent veterinarian, and are pregnant at time of sale.
5. A bred female is a female known to have been served by a bull either by natural breeding or artificial insemination, but it does not necessarily mean the female is safe in calf to that service.
6. A pasture-bred female is a female that has been pastured with a designated bull and has been exposed for the time stated, but it does not necessarily mean that this female is safe in calf to that bull.
7. An open female is a non-pregnant animal.
8. Calves sold off their dams (split pairs) shall carry the full breeding guarantee.

**PRIVILEGE OF PURCHASER TO EXAMINE:** The purchaser of a female animal may have her examined within twenty-four (24) hours after the fall of the hammer and prior to removal from sale premises. The pregnancy status or breeding status of a female to be examined, when found not to be as represented at the time of sale, is cause for the female to be returned to the seller as unsold.

#### EMBRYO TRANSFER:

1. Sellers should provide upon request a complete history of embryo transfer activity for any female offered for sale.
2. Withholding information on the existence of frozen embryos at the time of sale would be considered an unethical practice.

#### HORNED/SCURRED/POLLED DEFINITIONS:

1. **HORNED** - An animal with a horn growth affixed to the skull that has or has not been removed.
2. **POLLED/SCURRED** - An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.
3. **POLLED** - An animal with absence of horn growth. [An animal can have scurs and still be genetically polled.]
4. **SMOOTH POLLED** - A smooth-polled individual has no scurs and does not develop scurs later in life.

#### GUARANTEES:

1. If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value whichever is acceptable to the buyer. The buyer has thirty (30) days from date of sale to notify the seller that an adjustment is in order.
2. If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or at the buyer's option shall be exchanged for a smooth-polled animal of equal value.
3. If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment as a scurred animal is considered polled.
4. If an animal is sold as polled and has scurs, it shall be so announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

**OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:** The following adjustments do not preclude the right of the buyer and seller to mutually agree upon other terms and conditions for settlement of any disputes.

1. All claims for adjustment or refund must be made in writing either six (6) months from the date of sale or no later than when the animal reaches 24 months of age whichever occurs later, with the exception of claims involving misrepresentation of service sire or as otherwise provided herein.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller, at the buyer's expense, if in good physical condition, and the return is in compliance with the health requirements of the seller's state. The seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove the animal is a breeder. If at the end of six (6) months the seller is unable to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. Either option shall be deemed full satisfaction and settlement.
3. If a female is sold as "safe in calf" to a given sire or sires on a specified date or dates and proves not to be as represented, the buyer is entitled to a refund of the purchase price from the seller upon return of the animal and resulting progeny thereof to the farm of the seller at the seller's expense.
4. If a female is sold as "open" and proves to be with calf at time of sale and examined pregnant within sixty (60) days after sale, the buyer may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. It shall be the obligation of the seller to bear any expenses incurred for transportation of the animal in question to the farm of the seller.

**GENETIC TESTING AND TraitTrac STATUS:** Sellers must identify the TraitTrac status and the results of any qualitative genetic testing performed on any animals or genetic material offered for sale. The ASA considers it an unethical practice to misrepresent or fail to disclose the TraitTrac status or qualitative genetic test results of any animal or genetic material.

**DISCLOSURE OF MATERIAL INFORMATION:** Sellers must disclose all material information concerning any animal or genetic material offered for sale. For the purposes of these Sale Terms and Conditions, "Material Information" is defined as any information which would be likely to affect the value of the animal or genetic material if the information were known to the public.

Material Information includes, but is not limited to, information related to genetic tests, blood tests, ultrasound pregnancy results, disease tests, pregnancy and fertility test results, information related to the sex and age of in utero calves or embryos, and information related to the fertilization status of in utero calves, including whether the calf was conceived via artificial insemination or natural service. The ASA considers it an unethical practice to misrepresent or fail to disclose any Material Information concerning an animal or genetic material offered for sale.

**LIMITATIONS OF OBLIGATIONS:** These sale terms and conditions constitute a binding legal obligation between the buyer and seller of any animal or genetic material sold under these terms and conditions. However, the ASA, its directors, officers, employees and agents do not assume any obligation, legal or otherwise, to enforce the sale terms and conditions agreed to between buyer and seller.
